RELEVANT COURSEWORK

- Database Systems: MySql, MongoDB
- Web Development: Html, Css, JavaScript, React JS
- Object-Oriented Programming
- System Architecture

TECHNICAL SKILLS

- Cloud: Amazon Web Services, Microsoft Azure
- Container: Docker, Kubernetes,Helm
- Virtualization: VMWare, Hyper-V
- Scripting: Python, Bash, PowerShell
- Infrasturcture-as-Code: Terraform, Ansible

SUMMARY

DevOps Engineer

I am a motivated & graduate with a degree in computer science and a passion for DevOps engineering. I have a deep understanding of the fundamentals of software engineering and operations, and am proficient in the use of cloud, container, and virtualization technologies. I am well-versed in scripting languages such as Python, Bash, and PowerShell, as well as Infrastructure-as-Code tooling such as Terraform and Ansible. My expertise also extends to monitoring and logging tools and I'm always eager to learn new tools and techniques

WORK EXPERIENCE

DevOps Engineer

- Developed a web application to manage customer information.
- Implemented automated testing and deployment processes
- *Collaborated with other developers and project manager on design and development*

EDUCATION HISTORY

Bachelor of Science in information Technology
University: Kuvempu University
Year of Graduation: 2014

CERTIFICATIONS

AWS Solution Architect Associate 2023 Certification

HashiCorp Certified: Terraform Associate(002) 2023 Certification
